Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 August 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/29/03 has been entered.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Salisbury. Salisbury disclose a plug in jack comprising a jack contact consisting of a retaining part 16 and a jack 24, said jack being mounted on the retaining part so as to be pivotable by a limited angle and capable of longitudinal movement.

Per claim 2, said retaining part comprises a head portion 23, an adjoining annular groove 22 and a collar adjoining 21 said annular groove and wherein said Jack comprises spring shackles 25 engaging with said annular groove.

Per claim 3, the shackles have free ends provided with one hook (at 25) on each of the free ends.

Per claim 15, the retaining part is capable of being mounted on a surface.

Claim Rejections - 35 USC § 103

Art Unit: 2833

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Salisbury as in claim 1 in view of Evans.

Regarding claims 16 and 17, Salisbury does not show the details of the plug part except for showing pin 32 extending from electron tube 12. Evans discloses a plug in part including housing 56 and a contact capable of mating the jack contact discussed regarding claim 1, the plug contact including a plug in portion, and anchor portion and a surface mountable connection portion. At the time of the invention, it would have been obvious to use a plug part structure as disclosed by Evans in the Salisbury plug. The suggestion or motivation for doing so would have been to mount the plug contacts securely as taught by Evans.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Salisbury as in claim 3 in view of Linde. To the extent that the Salisbury jack is arguably not barrel shaped, Linde discloses a jack that is barrel shaped. At the time of the invention, it would have been obvious to change the shape of the Salisbury jack (at least the central portion) to be barrel shaped as taught in Linde. Such modification to the shape of the jack would have been a matter of obvious engineering design choice absent evidence that the particular choice of shape of the jack would have been significant. In re Dailey, 149 USPQ 47 (CCPA 1966).

Response to Arguments

Regarding the term "SMT connection," the examiner accepts applicant's argument that SMT refers to "portions capable of being mounted on a surface."

Applicant's arguments with respect to the rejections over the prior art have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 5 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims, for the reasons previously indicated.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ross Gushi whose telephone number is (703) 306-4508. If attempts to reach the examiner by phone are unsuccessful, the examiner's supervisor, Paula A. Bradley, can be reached at (703) 308-2319.
